## NEW SHOWROOM DISPLAYS

### SPECIAL POINTS OF INTEREST:

- New Showroom Displays
- Low VOC Product
- Giving Spirit
- Designing for your Appliance Needs
- LED's Offer New Lighting Options
- Coming Soon

### INSIDE THIS ISSUE:

Nashville Floods	2
Design Around Appliances	2
LED Lights	2
Coming Soon	3

We are continually updating our showroom displays in order to stay current with trending designs.

One of our most recent additions is a bathroom vanity display. This vanity is built out of maple wood and has been painted white. It features inset doors, half round column moulding with reed capitals, a valance above the sink and mirror, and fluted glass in a portion of the cabinet doors.

The doors and drawers show off Amerock crystal knobs. They also have European hinges and full-extension drawer slides.

The countertop is made from a beau-

AMEROCK CRYSTAL KNOB

tiful marble and highlights an under-mount white porcelain sink.

Showroom Bathroom Vanity

This display includes some cool storage ideas such as a unique towel storage rack, drawers that contain jewelry storage inserts, and "hidden" storage shelves on either side of the mirror.

## WHAT OUR COMPANY IS DOING TO STAY AHEAD

Nancy Stewart, our company's owner, and Dustan Crawley, our cabinet finisher, recently attended a seminar at Wurth Wood Group that was sponsored by M.L. Campbell. The seminar introduced new finishes and glazing processes. Our team also learned some new procedures for staining.

For our customers that are committed to the environment and green building standards or those who have a family member with allergies or breathing issues, we are now offering a low VOC product in our finishing process that has earned GREENGAURD Certification.

## NASHVILLE FLOODS

In response to the devastating floods that hit Nashville this summer, we would like to commend the quick response and recovery efforts of all those who helped, especially those in our community.

Here at Cross Cabinets we decided to donate a set of cabinets to a family in Nashville whose home was ruined by the flood waters.

We would not have been able to do this without the help of our employees and our suppliers.

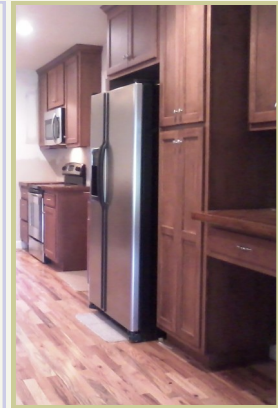

A big thank you goes out to our suppliers who donated materials for us to use in the building of the cabinets:

- Wurth Wood Group
- Meyer Decorative Surfaces
- HGH Hardware

Another big thank you to our employees who donated their own time to building this set of cabinets:

- Danny McClendon
- Barry Horne
- Richard McClure
- Travis Kowalski

We are very fortunate to work with such a caring and generous group of people.

Nashville Kitchen

*“It is important to consider the appliances that you want in your kitchen in order to integrate them into the design.”*

## APPLIANCES ARE PRESENTING NEW DESIGN OPPORTUNITIES

With appliance options expanding, kitchens are presented with new design opportunities.

Drawers that house appliances such as microwaves, dishwashers, and food warmers are very popular .

Another option is to apply custom made panels to refrigerator doors and dish-

washers in order to integrate them into the cabinets.

Hiding cook-top vents inside decorative hoods can be a great way to add a beautiful focal point in your kitchen.

Don't forget to customize your kitchen to your personal interest by adding a wine cooler, ice maker, or a coffee bar.

Decorative Hood

## NEW LINE OF LED LIGHTS

Our suppliers have recently brought to our attention a new line of LED lights that are great for lighting cabinetry.

They come in flexible strips which are easy to hide beneath wall cabinetry in order to light countertops.

They also can bend around corners and arches which enable you to light up just about any space.

The light strips are low voltage which ensures the individual bulbs have a long life. This is an added plus to the energy conscious consumer.

The light have a variety of color temperatures from cool to warm to create any mood in your space.

Other types of LED lighting, such as pocket lights, are also available.

**Innovative Designs Crafted  
To Perfection**

Cross Cabinets is a custom cabinet shop, specializing in new home cabinetry and cabinetry for remodeling projects of all sizes. We have been manufacturing quality cabinets for the Chattanooga community for 21 years at the same location in Soddy Daisy, Tennessee. We have made many additions to our facility and in our manufacturing technology over the years to offer the best in cabinetry. We strive to serve our customers and our builders with a beautifully crafted product that is delivered and installed as expected and on time.

If you would like more information please contact Nancy Stewart.

**C O M I N G   S O O N**

As we mentioned before, we are continually updating our showroom with new hardware, mouldings, drawer and shelf organizers, and lighting in order to give customers the opportunity to view various styles and options for their upcoming project.

Look for our new display coming this fall ...

**Closets!**

We have custom built several closets over the last few months.

Our customers rave over:

- The fact that they are all wood - no particle board or melamine!
- The price! We are less expensive than the local closet companies!
- The new storage solutions and options available to customize the space!
- The look! Gorgeous!
